

Always Shine-W

Food Grade Quality Stainless Steel Polish
Water-Based

ALWAYS SHINE-W is a light water based cream containing 100% food grade ingredients, that cleans and polishes all metal surfaces. Quickly removes tough oil based stains, watermarks, spots and stains of food origin. Works on stainless steel, chrome, brass, copper, silver, aluminum, enamel and porcelain. **ALWAYS SHINE-W** is odorless to allow for use in confined areas and leaves no greasy residue. clings to vertical surfaces for easy cleaning, and can even be applied directly to wet surfaces, eliminating the need to dry the surface first as with most oil-based metal polishes. Requires minimal effort to remove soil and smudges, while leaving behind a protective barrier that resists rusting and water marks. use on brass and copper to provide a moisture barrier that will help reduce tarnishing and the need to polish often. Unique spray valve allows product to be used in an upright or inverted position. **ALWAYS SHINE-W** can provide significant labor savings in restaurants, restrooms, office buildings, theaters and other places where their are metal surfaces to clean and polish.

Directions: Spray a light film directly onto the surface to be cleaned or onto a clean cloth. Wipe surface with a dry, soft cloth. Buffing with another clean cloth will make the surface sparkle.

Areas of Use:

- *sinks
- *refrigerators and freezers
- *stoves, hoods and grills
- *dishwashers
- *kick plates
- *trash cans
- *drinking fountains
- *ice machines
