

Always Shine

Food Grade quality
stainless steel polish
Oil Based

ALWAYS SHINE is a unique cleaning and polishing formulation in which every ingredient is of food grade quality. Quickly cleans and restores luster to metal surfaces. Contains no chlorinated solvents, acids, Hexane, abrasives or CFC's. **ALWAYS SHINE** cleans and polishes all metal surfaces, plus leaves behind a protective coating which resists finger marking and smudges. Use on stainless steel, aluminum, brass, copper, zinc and mild steel. Quickly removes tough oil based stains, watermarks, spots, and stains of food origin with minimal effort. Use on brass and copper to provide a moisture barrier that will help reduce tarnishing and the need to polish often. **ALWAYS SHINE** can provide significant labor savings in restrooms, office buildings, theatres and other places where there are metal surfaces to clean and polish. Directions: Spray a liberal amount directly onto the surface to be cleaned or onto a clean cloth. Wipe surface with a dry, soft cloth. Buffing with another clean cloth will make the surface sparkle.
