

# Anti-Spat

Water-based welder  
anti-spatter

A water-based release agent that acts as a shield to prevent weld spatter from sticking to welding guns, nozzles, contact tips, metal parts and surrounding metal surfaces. Contains metal corrosion inhibitors, wetting agents, and special anti-adhesion materials that help make welding neater and makes cleanup easier. **ANTI-SPAT** is non-smoking, and low odor. Prevents spatter build-up on welded parts and surfaces, increasing the life of your tools and tips.

**Directions:** Spray a light film on gun tip or nozzle and area to be welded. Tap tip frequently to prevent excess from building up. If surface is to be painted, use Omega's **MEGA SAFE** safety solvent or **MEGA POWER** heavy duty degreaser to remove any loose film.

**Areas of Use:**

- \*welding shops
- \*plumbers
- \*municipalities
- \*industrial plants
- \*repair shops

Health	1
Flammability	4
Reactivity	0
Protection	B

Appearance and odor.....	light brown liquid, odorless
Specific Gravity.....	Concentrate - 1.00
Propellant.....	Liquefied Petroleum Gas
VOC.....	14%
NFPA Fire Rating.....	Extremely-flammable Spray
