

Battery Guard

Protective Coating

BATTERY GUARD is a long term flexible, non-tacky coating that is not affected by temperatures from -40 to 175°F. **BATTERY GUARD** leaves a translucent film. **BATTERY GUARD** can easily be removed with mineral spirits. Assures maximum battery performance on fleet cars, trucks and buses, golf carts, fork trucks, construction and agricultural equipment.

Directions: Shake well. Use Omega's **BATTERY CLEANER-A** before use. Make sure the surface is clean and dry. Spray a thin light film. Let set for approximately 5 minutes. Complete setting of protective coating takes approximately 2 hours after spraying.

Areas of Use:

- *battery terminals
- *cables
- *cable ends
- *wing nuts
- *terminal posts
- *hold downs
- *relay boxes
- *power connections
- *golf courses
- *municipalities
- *vehicle maintenance
- *equipment maintenance

Health	3
