

Carb Clean

Carburetor Cleaner

CARB CLEAN provides an ultra high volatility formula that cleans, degreases and removes gum, carbon, sludge and varnish deposits from carburetors and automatic chokes without harming oxygen sensors or catalytic converters.

The heavy flushing action easily blasts away carbon and grease buildup. **CARB CLEAN** helps reduce fuel consumption and improve system performance. Great for manifold heat control valves and PCV valves.

Directions: CARBURETOR AND LINKAGE: With engine cold, remove air filter and spray entire exterior surface of carburetor, linkage, springs and housing.

Allow to dry, then start engine and spray down the carburetor throat to remove deposits from the lower throttle.

AUTOMATIC CHOKES: With engine off, spray onto both ends of the choke valve and corresponding linkages while opening and closing choke by hand.

MANIFOLD HEAT CONTROL VALVE: With engine cold spray on both ends of heat control valve shaft.

PCV VALVE: Disconnect crank case side of PCV and with engine running, spray into open end of the valve while working the plunger back and forth.

Areas of Use:

- *chokes
- *carburetors
- *vacuum pistons
- *thermostatic coils
- *engine parts
- *motors
- *generators
- *starters
- *fleet garages
- *machine shops
- *forklift companies
- *car rental companies
- *equipment rental companies

Health	2
Flammability	3
Reactivity	0
Protection	B

Appearance and odor.....	Colorless liquid, aromatic odor
Specific Gravity.....	Concentrate - 0.815
Propellant.....	Carbon Dioxide
VOC.....	~45%
NFPA Fire Rating.....	Extremely Flammable Spray
