

Coat It

High solids
industrial coating

COAT IT is a high solids industrial coating that is lead free and V.O.C. compliant. It has single coat hiding power due to the 31% solids content making **COAT IT** the best choice for any job. Can be used on metal, wood, plastic, masonry and more to protect against sun damage, rust, oil, gasoline, corrosive chemicals and wear. Resists fading, cracking, chipping and peeling. Does not contain lead, CFC's chromates or chlorinated solvents. **Available in White, Black, Red, Green, Yellow and Blue.**

Directions: Clean surface with degreaser such as Omega's **MEGA POWER** heavy duty degreaser and allow to dry before painting. Shake well. Spray the surface with steady, even strokes at a distance of 10-12 inches. Several lighter coats will provide a better finish than one heavy coat.
