

COOL STOP

Cooling System Sealant

COOL STOP Cooling System Sealant quickly seals minor radiator leaks, seals hairline cracks in the block or head and stops seeping around gaskets and hose connections. **COOL STOP** contains ultra small refined organic fibers, an organic buffer to deter rust & corrosion, and a suspension thickener. Extend the life of your engines and prevent overheating from fluid loss to maximize your equipment investment.

Directions: Do not remove radiator cap while engine's cooling system is hot. With engine off, shake can well and pour entire contents into radiator. Replace cap and start engine. Run engine until leak stops. Leave in system to prevent further leaks.

Areas of Use:

- *city vehicles and equipment
- *county vehicles and equipment
- *busses
- *fleet vehicles
- *limousines

Health	1
Flammability	0
Reactivity	0
Protection	B

Appearance and odor.....	Cloudy brown liquid, Mild Odor
Specific Gravity.....	1.00
VOC.....	0%
NFPA Fire Rating.....	Non-flammable
