

Dye Away

Dye, red wine, and
Kool Aid® stain remover

DYE AWAY is one of the latest breakthroughs in cleaning chemical technology. This remarkable product will remove red wine stains, food dye stains, shoe polish, and other dye based stains from carpet. Stains that used to be next to impossible to get out can now be removed easily, and carpets that would have had to be replaced can be saved, reducing operating expenses greatly. **DYE AWAY** uses a heat transfer process that is easy for anyone to do successfully. No special tools or training are required to use **DYE AWAY** with great results. Carpet care professionals charge high fees to remove the types of stains that can now be removed by anyone with **DYE AWAY**. This product is safe for use with all carpet cleaning machines so that once the spots are gone, the entire carpet can be cleaned by extraction without harm to the machine. Try Omega's **RENEW** extractor solution for bright, clean, new looking carpets. Also Omega's **K.O.'D** carpet spotter is perfect for difficult spots that do not require the heavy duty spotting of this heat transfer process. **DYE AWAY** is biodegradable.

Directions: Apply **DYE AWAY** directly to spot to be cleaned. Fill a household iron with water and heat iron to lowest steam setting. Lay a moist, white cotton towel over the stain. Set the heated iron on the towel. Apply pressure for about 10 seconds. Repeat as needed with a clean area of the towel.

Health	1
Flammability	0
Reactivity	0
Protection	B

Areas of Use:

- *apartment complexes
- *retirement facilities/assisted living
- *hotels
- *school districts
- *office buildings

Appearance and odor.....	Clear liquid, no odor
