

EPA PT Diesel/Gas

Fuel additive

In diesel engines **EPA PT DIESEL** imparts fuel stability during storage, and dispersancy for gum and tar. When added to diesel fuel this blend of corrosion inhibitors, detergents, sludge dispersancy and algaecides will increase efficiency and prolong operational life of engines and prevent corrosion in pipelines and storage tanks. **EPA PT DIESEL** drastically reduces the amount of pollutants released into the air. Injector cleaners provide prolonged performance life and water tolerance additives allow moisture to settle from the fuel rapidly.

EPA PT GASOLINE will prevent deposits, inhibit corrosion and dissolve sludge in gasoline. The blend of combustion aids, corrosion inhibitors and detergents in **EPA PT GASOLINE** keeps engines running properly and increases efficiency. Provides anti-icing protection to prevent damage to vehicle fuel system.

Directions: Use 1 gallon of **EPA PT GASOLINE** or **DIESEL** per 600 gallons of fuel.

Areas of Use:

- *generators
- *fuel storage tanks
- *construction equipment
- *equipment in storage
- *vehicles in transit
- *marine vessels
- *Naval shipyards
- *golf course maintenance
- *vineyards
- *farms

Health	2
Flammability	3
Reactivity	0
Corrosive	0

Appearance and odor.....	Amber liquid, Characteristic odor
Specific Gravity.....	Concentrate - 0.79
VOC.....	812 grams per liter
NFPA Fire Rating.....	Flammable
