

Enviro-Tac

Contact Cleaner

ENVIRO-TAC cleans grease, oil, dirt, moisture and flux from circuit boards, motors, film, relays, ignition switches and other precision equipment. This n-propyl bromide formula is nonflammable, non-conductive, residue-free and is formulated to be safe on most plastics, including polypropylene, Neoprene W, nylon, PTFE, PVC, silicone rubber, butyl, and others. If unsure of application, test in an inconspicuous area first. Excellent as a replacement for products containing 1,1,1 trichloroethane. Always test on plastics prior to use. **ENVIRO-TAC** can be used to clean dirt, grease and other soils from precision electronic equipment. Areas of use include communications industry, aeronautics, electricians, information technology, mechanics, and electronics repair. **ENVIRO-TAC** has a 14,000 volt dielectric, it evaporates quickly, leaving no residue, its an excellent replacement for areas where chlorinated or fluorinated solvents cannot be used and it is also VOC compliant in all 50 states as an electronic cleaner.

DIRECTIONS: Remove cap and point actuator toward area to be cleaned. May be used on running equipment. Non-flammable and non-conductive.

Areas of Use:

- *Circuit boards
- *Wire terminals
- *Relays
- *Switches
- *Contacts
- *Circuit breakers
- *Tuners
- *Control panels
- *Potentiometers
- *Cable ends
- *Receptacles
- *Motors
- *And other electronic equipment

Health	2
Flammability	1
Reactivity	0
Protection	B

Appearance and odor.....	Colorless liquid, ether-like odor
Liquid Density	Concentrate - 1.29
Propellant	Tetrafluoroethane
VOC Limit	75%
NFPA Fire Rating.....	Flammable
