

Fly Away

Deodorizer and
natural fly repellent

This unique product is designed to eliminate the buildup of organic waste like grease in drains and grease traps as well as under heavy equipment. **FLY AWAY** is excellent for use in kitchens to eliminate the sanitation problems that restaurants and food preparation facilities often face due to buildup of organic waste like grease in grease traps and underneath heavy equipment. This highly concentrated bacterial gel actually digests grease buildup that occurs over time. By inhibiting the normal biological production of odor causing compounds, **FLY AWAY** removes foul odors from drain lines, grease traps, and sewer lines, and contains a natural fly repellent. For food preparation, keep area sanitized with Omega's **SANI-SPRAY RTU** to avoid food contamination and maintain required sanitation levels. Non-toxic, non-caustic, non-pathogenic and fully biodegradable.

Directions: If drain is not regularly used, moisten drain by pouring 1-2 gallons of warm water into the drain. Apply during times of lowest drain use. Add 8 ounces to each drain and grease trap area. Repeat daily for 5 to 7 days, then use once per week to maintain drain line or trap. For non-drain areas such as sinks, drain grates, floors etc., remove large debris, then spray area liberally until wet, repeat daily for 3 to 5 days. Then spray area every 1 to 2 weeks for maintenance.

Health	1
Flammability	0
Reactivity	0
Protection	N/A

Areas of Use:

- *industrial kitchens
- *retirement facilities
- *hotels
- *school districts
- *golf courses
- *cities and counties

Appearance and odor.....	Blue green, Milky green with Citronella Scent
Specific Gravity.....	Concentrate - 1.0
% Volatile by Volume.....	>90%
NFPA Fire Rating.....	Non-flammable
