

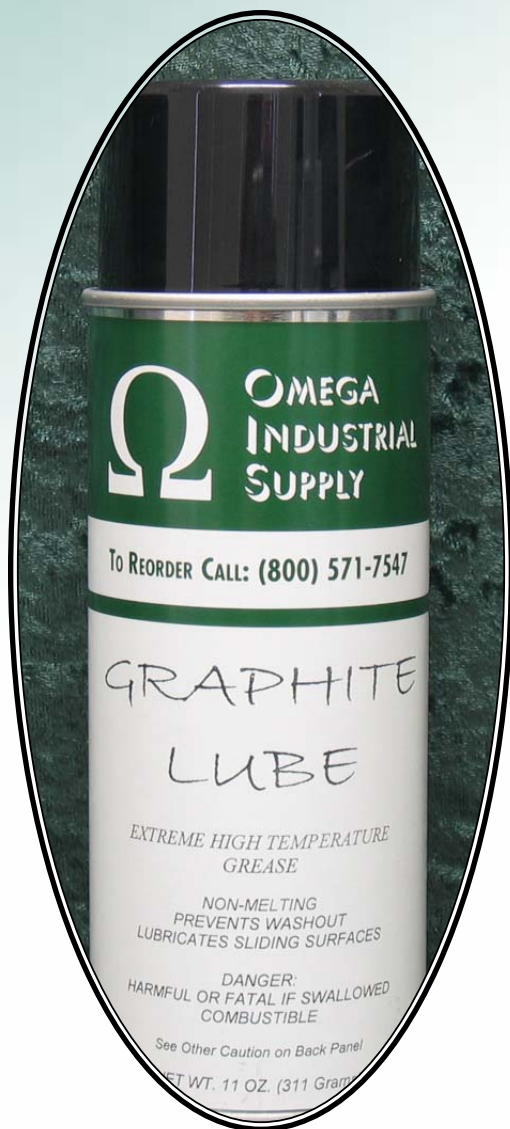

# Graphite Lube

High temp graphite grease lubricant

**GRAPHITE LUBE** is an extra heavy duty, high temperature, high pressure aerosol grease that is portable and easy to use. It is non-melting, resists wash out and lubricates all metal surfaces. Remains highly adhesive to metals and provides an impenetrable barrier against rust and corrosion. **GRAPHITE LUBE** will not break electrical grounding and is non-dripping. This product will leave a grease film that will lubricate and penetrate deeply into hard to reach areas to prevent corrosion of metal surfaces. This versatile product provides lubrication under temperature variations from -100° to 1000° F.

**Directions:** Clean away all old grease and dirt using one of Omega's heavy duty degreasers such as **POW** or **NATURAL WAY**. Shake well. Spray surface with a light mist from a distance of 10 - 12 inches.

**Areas of Use:**

- \*industrial plants
- \*shipyards
- \*fork lift masts
- \*ladle pins
- \*rollers
- \*mining operations
- \*cold storage
- \*fleet vehicles
- \*bushings
- \*lug bolts
- \*high speed open end shafts

Health	2
Flammability	4
Reactivity	0
Protection	

Appearance and odor.....	Black liquid, characteristic odor
Specific Gravity.....	Concentrate - 0.745
Propellant.....	Hydrocarbon
VOC.....	50%
NFPA Fire Rating.....	Extremely-flammable Spray
