

Grease-It Silver

Synthetic blend grease
Extra high temp

GREASE-IT SILVER is a metallic silver combination of an olefinic copolymer anti-seize compound and non-soap bentone grease. It is fortified with additives that provide it with excellent lubricating properties. **GREASE-IT SILVER** is made from mid-continent high viscosity solvent refined oil, an olefinic copolymer, and is fortified with molybdenum disulfide (in sub-micron) and aluminum.

GREASE- IT SILVER has a low gumming base, plus no dropping point so that it will not run out when heated. It sticks to the metal and lets the thin film of molybdenum disulfide and aluminum act as the lubricant at elevated temperatures. **GREASE-IT SILVER** provides excellent lubricating properties, stability and anti-wear protection for metal parts. This high temperature anti-friction lubricant is non-melting in excess of 550°F and has excellent water resistance. **GREASE-IT SILVER** is an excellent lubricant for gears, bearings, conveyors, drives, turbines, furnaces, kiln cars, chains, burner assemblies and similar applications.

Directions: On first application, force sufficient **GREASE-IT SILVER** through the bearing or fitting to flush out all old grease and contaminants. Where possible, wash out all old grease entirely, and replace with **GREASE-IT SILVER** for maximum protection.

Areas of Use:

- *construction equipment
- *mining applications
- *railroad uses
- *high heat causing equipment
- *furnaces
- *engines

Health	1
Flammability	1
Reactivity	0
Protection	B

Appearance and odor.....	Silver gel, Petroleum odor
Specific Gravity.....	Concentrate - 0.8
VOC.....	<5%
NFPA Fire Rating.....	Non-flammable >400°F (COC)
