

# Grip It

Increases grip on  
nuts and bolts by 400%

**GRIP IT!** stops tools from slipping off of rounded or deformed fasteners by increasing torque between the tool head and the fastener over 400%. Works instantly with no waiting or cure time, and simply wipes clean when finished. You can leave **GRIP IT!** on the tool head to do many fasteners, re-applying only when you start slipping again. This handy product also extends tool life indefinitely if used in a preventive capacity by eliminating cam out or rounding of hex's before they ever occur. **GRIP IT!** will work with any type of fastener or tool, hand or power driven, and is especially effective with torx drives and allen-heads. The compact size of **GRIP IT!** makes it easy to take to any job and it is a necessary addition to every tool box. **GRIP IT!** is non-toxic, non-corrosive, odorless and non-irritating. **Directions:** Shake well. Apply one drop of **GRIP IT!** to the head of the fastener to be removed or to the tip of the screwdriver. Wipe clean when damaged fastener has been removed.

#### Areas of Use:

- \*machine shops
- \*building maintenance
- \*vehicle maintenance shops
- \*sign shops
- \*ship yards
- \*plumbing
- \*electrical
- \*paint
