

# Jell Strip

Gel based paint and  
varnish stripper  
water wash off

**JELL STRIP** is a high power, fast acting solvent that gels and clings to surfaces to blister paints, varnish, acrylics, epoxies and lacquers for easy removal. **JELL STRIP** can be wiped off, scraped off, or flushed away with a heavy water blast. Also effective for removing most paints from concrete and brick surfaces. Contains no acids or alkalis, non-corrosive to substrates. Great for graffiti removal on glass, brick, wood, cinder-block, concrete, and metal dumpsters. Can also be used by vehicle maintenance shops to remove decals and gaskets from equipment, and by plumbers to ease the removal of old caulk that needs to be replaced. After using **JELL STRIP** for graffiti removal, coat the clean surface with Omega's **PROTECT IT** to prevent any new marking by vandals from sticking to the surface.

**Directions:** Surface should be dry. Hold can 8-10 inches from surface and apply a heavy even coat to entire surface. Allow to remain for several minutes. Remove residue with scraper, putty knife, cloth or a strong water spray.

#### Areas of Use:

- \*heavy duty graffiti removal
- \*decal removal
- \*adhesive removal
- \*wood and metal refinishing
- \*departments of transportation
- \*municipalities
- \*sign shops
- \*vehicle maintenance shops
- \*plumbing departments

Health	3
Flammability	3
Reactivity	1
Protection	H

Appearance and odor.....	Opaque liquid, mild solvent odor
Specific Gravity.....	Concentrate - 1.130
Propellant.....	Liquefied Petroleum Gas
VOC.....	~39.8%
NFPA Fire Rating.....	Extremely-flammable Spray
