

# Liquid Auger

Dual Phase Drain Opener  
with Odor Blanket

**LIQUID AUGER** is a fast working, industrial bi-phase drain opener that works without harming pipes or fixtures. It features an inhibited virgin acid that is safer to handle than conventional acidic drain openers, combined with a grease eliminator that also acts as an odor masking agent. **LIQUID AUGER** will unclog even the toughest blockages saving you the excessive cost of having a plumber come out to your property. If you are a plumber, this product will be your first choice to use! The handy single use pint containers are designed for added safety and convenience. **LIQUID AUGER** is safe on all types of plumbing including copper, PVC, galvanized, zinc, and brass.

**Directions:** Wear acid resistant face shield, apron and gloves. Product could react violently with some materials, causing gasses and hot acid to spray back out of drain. Never use product in drains after, with, or before hot water, other drain openers, or other chemicals. Do not add water to acid. Do not pour into standing water or a completely stopped drain. Never use with a plunger. Empty entire contents into drain and quickly cover opening with a deep container to shield against any splash-back. Wait 15 minutes then clear drain of acid by flushing with a large amount of cold water. After drain is clear use Omega's **MEGA BAC** liquid alive bacteria to re-establish the ecological balance of the pipes and remove any remaining odors.
