

# M-Bomb

Insecticide Fogger

**M-BOMB** is a total release insecticide fogger that is designed to seek out bugs where they hide for optimum performance. The water based formula kills on contact, and is effective for killing flea larvae which increases its effectiveness, reducing the need to re-bomb the area. **M-BOMB** kills a wide variety of pests including ants, carpet beetles, earwigs, fruit flies, grasshoppers, silverfish, hornets, wasps, yellow jackets, house flies, mosquitoes, moths, spiders, crickets, cockroaches, ticks, fleas (adult and larvae) and more. Has no unpleasant odor, is non-staining, and one can treats up to 6000 cubic feet. For spot treating and immediate action in occupied spaces, use Omega's **TERMINATOR** crawling insect killer.

**Directions:** Turn off all ignition sources such as pilot lights. Shake well before using. Place can on newspaper in center of room. Point away from face and depress tab. Leave room and close door. Keep area closed for 2 hours before airing out. Allow to air for 30 minutes before re-occupying space.

**Areas of Use:**

- \*apartments
- \*attics
- \*storage areas
- \*basements
- \*building maintenance
- \*municipalities
- \*water treatment plants
- \*crawl spaces
