

# Metal Protect

**ONLY OMEGA™**

Wax like coating to protect parts from corrosion

**METAL PROTECT** provides a long term flexible, dirt resistant, anti-rust and anti-corrosion coating that will not crack, peel or flake. Protects metals from exposure to weather, high humidity, chemical fumes and salt spray. The flexible film is non-tacky and effective from -40° to 175° F. Excellent for protecting parts in transit or storage, and is translucent so that part numbers or identification codes underneath can be read easily. **METAL PROTECT** can be easily removed with mineral spirits or Omega's **MEGA SAFE** safety solvent when necessary. The convenient aerosol packaging is portable and easy to use. It is non-chlorinated and ozone safe. Meets Mil Spec MIL-C-16173D-Grade 4 and MIL -C-83933A.

**Directions:** Clean surface with Omega's **MEGA POWER** degreaser to ensure surface is free from dirt and dust during storage. Allow to dry completely. Spray a thin uniform film. Allow approximately 5 minutes to set up. For more severe storage conditions, a second coating can be applied within a few minutes. Complete cure in approximately 2 hours.

**Areas of Use:**

- \*milled parts
- \*parts in transit
- \*parts in storage
- \*maintenance crews
- \*universities
- \*schools
- \*maintenance crews
- \*large molds
- \*seasonal equipment

Health	1
Flammability	3
Reactivity	0
Protection	B

Appearance and odor.....	Dark brown liquid, Solvent odor
Specific Gravity.....	Concentrate - 0.848
Propellant.....	Liquefied Petroleum Gas
VOC.....	76.33%
NFPA Fire Rating.....	Extremely Flammable Spray
