

# Omega Tracer

Aniline Dye Leak Detector

**OMEGA TRACER** is a strong aniline dye which is used when drain and sewer systems must be traced in order to know the flow of liquid and to detect any leaks or problem areas. It can also be used to check for leaks in toilets, sinks and other plumbing lines. When used regularly, **OMEGA TRACER** can help detect small problems before they become major issues. Save yourself from a potential disaster by being proactive! Put this quick and easy task on your preventive maintenance schedule today. **Available in green/yellow and red.**

**Directions:** Simply pour a suitable amount of **OMEGA TRACER** into water system, toilet or plumbing lines to determine the direction of flow or location of leak.

**Areas of Use:**

- \*cities and counties
- \*water treatment plants
- \*apartment complexes
- \*office buildings
- \*sewer departments
- \*plumbing departments
- \*school districts
