

Rust X Q

Rust converter
liquid

RUST X Q chemically neutralizes rust and leaves a tough, long term, rust preventative coating. Early prevention to keep rust spots from spreading will allow you to retain much of the strength of the metal and avoid costly replacement. **RUST X Q** seals, protects and prolongs the life of ferrous metal. No major surface preparation is required because only the loose rust is removed eliminating the need for scraping or sand blasting. Upon application, rusted area turns to a protective finish which can be painted if desired. Excellent for treating spots before they become an issue. For maximum protection use Omega's **ARMOR COAT** stainless steel coating to coat new metal as well as areas that have been treated with **RUST X Q**.

Directions: Surface must be clean and dry. To ensure removal of grease and oil residue, clean with Omega's **MEGA POWER** degreaser prior to application. Remove loose rust with wire brush or sand paper. Apply a thin, even coating onto the rusted metal. A second application is recommended after first coat is dry.

Areas of Use:

- *industrial facilities
- *bottling and packing plants
- *shipyards
- *cities and counties
- *amusement/water parks
- *paint departments
- *facilities maintenance departments

Health	1
Flammability	0
Reactivity	0
Protection	B

Appearance and odor.....	White liquid, Mild odor
Specific Gravity.....	Concentrate - 1.06
VOC.....	<4.0%
NFPA Fire Rating.....	Non-Flammable
