

# Rust X

Rust converter  
and metal primer

Chemically neutralizes rust and leaves a tough, long term, rust preventative coating. Early prevention to keep rust spots from spreading will allow you to retain much of the strength of the metal and avoid costly replacement. **RUST X** seals, protects and prolongs the life of ferrous metal. No major surface preparation is required because only the loose rust is removed eliminating the need for scraping or sand blasting. Rusted area turns to a black protective finish which upon curing can be painted if desired. Excellent for treating spots before they become an issue. **RUST X** is not flammable when dry. For maximum protection use Omega's **ARMOR COAT** stainless steel coating to coat new metal as well as areas that have been treated with **RUST X**. To avoid waste of unused product, our convenient aerosol packaging allows for storage of unused portion, no mess, no waste.

**Directions:** Surface must be clean and dry. To ensure removal of grease and oil residue, clean with Omega's **MEGA POWER** degreaser prior to application. Remove loose rust with wire brush or sand paper. Spray a thin, even coating onto the rusted metal. A second application is recommended after first coat is dry.

**Areas of Use:**

- \*industrial equipment
- \*playground equipment
- \*awnings
- \*bottling and packing equipment
- \*docks and ships
- \*guard rails
- \*parking meter posts
- \*valves and fittings

Health	1
Flammability	3
Reactivity	0
Protection	B

Appearance and odor.....	Dark liquid, mild odor
Specific Gravity.....	Concentrate - 0.895
Propellant.....	Liquefied Petroleum Gas
VOC.....	75%
NFPA Fire Rating.....	Extremely-flammable Spray
