

# Safe Step

Epoxy based  
non-slip paint

**SAFE STEP** is a super hard, textured one part epoxy coating that quickly cures to a slip resistant rough grit surface. Unique aerosol contains special synthetic grit that contains no sharp edges so it will not cut wet feet or hands, aids in the reduction of slip and fall accidents, and makes slippery surfaces more safe to walk on. Helps decrease potential hazards due to slippery surfaces, and reduces the potential for personal injury or liability claims. Convenient aerosol eliminates the need for mixing, waste, added cleanup, and application of a separate grit. **SAFE-STEP** is designed for interior and exterior use on concrete, steel, wood, fiberglass, aluminum, tile, and more. One application of **SAFE-STEP** lasts for up to six months depending on foot traffic. **Available in Clear, Gray, Yellow, and Black.**

**Directions:** To ensure proper adhesion, clean area with Omega's **MEGA POWER** degreaser to ensure area is free of any grease or oily residue. Existing paint can be removed with **JELL STRIP**. For best results on concrete, etch area first with **CON-RENEW**.

Allow surfaces to dry before application of **SAFE STEP**. Shake can well before and during application. Spray in a sweeping motion 12 to 15 inches from surface to be treated. Dries to touch in one hour. Wait 24 hours before subjecting to heavy foot traffic.

#### Areas of Use:

- \*steps
- \*ramps
- \*loading docks
- \*sloped walkways
- \*bathtubs, tile
- \*running boards
- \*public restrooms
- \*ladders
- \*vehicles

Health	2
Flammability	4
Reactivity	0
Protection	1

Appearance and odor.....	Colored liquid, solvent odor
Specific Gravity.....	Concentrate - 1.02
Propellant.....	Mixture
VOC.....	~45%
NFPA Fire Rating.....	Extremely-Flammable Spray
