

Sani Wipes

Hand sanitizing wipes

SANI WIPES waterless sanitizing towels are made from a non-abrasive fabric that cleans hands while killing bacteria, yet they are gentle enough for repeated use without drying out skin. **SANI WIPES** are ideal for cleaning and sanitizing when soap and water is not available. Plus, each towel is fortified with an emollient and natural oil to prevent chapping and drying of the skin. **SANI WIPES** can also be used to clean and disinfect hard surfaces such as telephones, desks, lunch tables, door handles, tool handles and anywhere else germs can collect. Great for hand washing to reduce bacteria on skin when soap and water are not available. Helps to keep staff healthy by reducing germs and bacteria that cause illness.

Directions: Wet hands or surface completely with product and allow to dry.
