

Slime Away Power Foam

Drain opener and
degreaser

This natural citrus based product is designed to clear clogged drain lines. The high pressure spray through the 18" tube permits quick penetration directly to the source of the problem to dissolve grease, body oils, soap and sludge buildup. The tube attachment for **SLIME AWAY Power Foam** also allows easy access for clearing hard to reach areas such as drinking fountain and ice machine drain lines, plus air conditioner condensation lines. **SLIME AWAY Power Foam** is an ideal product to use on a preventive maintenance program because it does not need to be rinsed, it can sit in the drain line indefinitely. **SLIME AWAY Power Foam** contains no chlorinated solvents or petroleum distillates, is non-caustic, non-acid, and has no harmful vapors. Completely biodegradable.

Directions: Attach flexible tube to spray nozzle. Direct tube down drain as close to clog as possible. Spray liberally. Allow ample time for product to penetrate and break down the clog. Flush drain with water. Re-apply periodically on a preventive maintenance program to keep drain flowing freely.

Areas of Use:

- *drinking fountains
- *garbage disposals
- *condensate lines
- *ice machine drains
- *soda fountain drains
- *schools
- *hospitals
- *municipalities
- *restaurants
