

Strip-It

Baseboard stripper

STRIP-IT is a strong cleaner in a foam base for quick effective removal of all waxes and finishes from baseboards and wall tiles without harming most painted surfaces. **STRIP-IT** has a unique upside-down valve that allows for easy application, and the thick formula stays where sprayed. Simply treat the baseboards just prior to stripping the floor. As you strip or mop the floor the emulsified buildup on the baseboards just washes away. Maintaining clean floors makes a great first impression on all who enter plus lengthens the life of the flooring itself. Omega's **MEGA SHINE** and **MEGA STRIP** are the perfect way to help make the job easier. Our high solids wax and non-amoniated stripper will not only make the job easier but it will also last longer, increasing the length of time between waxing.

Directions: Spray from about 6-10 inches. Coat baseboard with a thin coating and let stand for 3 to 5 minutes. Can also be used for spot cleaning. Wipe off any residue with a wet sponge.

Areas of Use:

- *baseboards
- *corners
- *edges
- *stairs
- *linoleum floors
- *tile
- *porcelain

Health	2
