

Tough Clean Q

Oven and grill cleaner
and decarbonizer

TOUGH CLEAN Q is a unique semi-viscous liquid that clings to verticle surfaces to extend cleaning time and dissolve carbon deposits and buildup, so that it can be easily wiped away. Its heavy-duty cleaning action will quickly penetrate and dissolve heavy soils commonly found in ovens and grills, or on cooking utensils and food processing equipment. Removes baked on grease, grime and carbonized food in one easy step. Strong enough to clean outside BBQ grills and industrial ovens and hoods. Used by food establishments, housing authorities, etc. for their toughest jobs. **TOUGH CLEAN Q** does not have the harsh fumes usually associated with many oven cleaners.

The powerful formula is designed for maintenance professionals who are looking for a high performance product that decreases labor time. **TOUGH CLEAN Q** is biodegradable. For exterior surfaces of stainless steel, polish with Omega's **ALWAYS SHINE** for a finished look.

Directions: Works faster on ovens preheated to about 160°. Brush or pour **TOUGH CLEAN Q** onto soiled area, or spray with trigger type sprayer. Allow to stand for 15 to 30 minutes. Allow longer for cool oven, then wipe clean. It is recommended to protect hands with Omega's **SHIELD** or wear gloves when using with this product.

Health	3
Flammability	0
Reactivity	1
Protection	B

Areas of Use:

- *BBQ grills
- *stove hoods
- *exhaust fans
- *schools
- *institutional kitchens
- *restaurants
- *hotels
- *food plants
- *apartments

Appearance and odor.....	Opaque light brown liquid, Mild Scent
Specific Gravity.....	Concentrate - 1.238
VOC.....	50 mg/l
NFPA Fire Rating.....	Non-Flammable
