

X-Away

X-Ray drain cleaner
& maintainer

This X-Ray and photo development equipment drain cleaner dissolves and removes obstructions caused by organic matter. This new technology was developed to keep drains free flowing and should be used as a preventive maintenance item. **X-AWAY** contains sodium bisulfate that is a slow acting chemical complex to clean out slow flowing drains. This preventive maintenance product will save time and effort by keeping the dissolved minerals associated with photo and X-Ray processing to a minimum and preventing build-up and stoppages. It is convenient and easy to use with no mixing hazards. **X-AWAY** will not harm plumbing or septic systems and is much safer to store and use than acids.

Directions: Add 2-3 ounces to drains twice weekly, adjusting amount and frequency as needed.

Areas of Use:

- *hospitals
- *clinics
- *office buildings
- *veterinary clinics
- *colleges
- *photo labs
- *plumbing shops

Health	3
Flammability	0
Reactivity	0
Protection	B

Appearance and odor.....	Red liquid, Mild Odor
Specific Gravity.....	Concentrate - 1.33
VOC.....	0%
NFPA Fire Rating.....	Non-flammable
