

# Reflect

Bright Reflective Coating

**REFLECT** improves nighttime safety and awareness by creating a bright, reflective coating on almost any surface. Applies semi-transparent. Under direct light, thousands of tiny reflective glass beads create powerful brightness. Provides greater visibility to objects including mailboxes, bicycles, house numbers, water valves, rocks, steps, fences, curbs, railings, trailers, autos, RVs, snowmobiles, motorcycles, boats, running shoes, pet collars, safety vests, clothing, helmets, signs, buoys, and many other items. Works on fabric, asphalt, concrete, masonry, rubber, plastic, stucco, and wood.

**Directions:** Test in an inconspicuous area first. Clean surface with **MEGA POWER**. Remove any dirt, rust, wax, grease, and other debris. Protect surrounding area from overspray. Shake can before use. Hold can at least 12" from surface to be coated. Apply product on the clean, dry surface. Spray in short, overlapping strokes. A mist spray will provide superior results compared to a heavy spray. For larger areas, apply several thin coats. **DO NOT OVER APPLY!** Apply in temperatures between 40°F and 90°F. One can covers approximately 15 sq. ft. Surfaces dries in 10 minutes. To clean nozzle after use, turn can upside down and spray until valve clears.

**Areas of Use:**

- \*asphalt
- \*concrete
- \*fabric
- \*masonry
- \*plastic
- \*rubber
- \*stucco
- \*wood

Health	2
Flammability	3
Reactivity	0
Protection	N/A

Appearance and odor.....	Light grey liquid, aerosol: aromatic odor.
Specific Gravity.....	1.37 - 1.41 (liquid)
Propellant.....	Propane
VOC (%by weight).....	60.0 - 64.0
NFPA Fire Rating.....	Extremely Flammable
