

Acid Absorb

Industrial absorbent
for use on acids

This industrial absorbent will soak up most any liquid and is for use on any spill or leak. Many absorbents specifically say 'not for use on acids' but **ACID ABSORB** is specially formulated for this purpose. It will neutralize acids and acid by-products, making this a truly versatile absorbent. Use **ACID ABSORB** for any spill or leak that may contain acid such as heavy duty cleaners and drain openers to quickly neutralize the acid and help increase employee safety. For added protection apply Omega's **SHIELD** protective barrier on hands and any other exposed skin before the clean-up process and when using products that contain acids.

Directions: Sprinkle **ACID ABSORB** onto liquid to be picked up. Sweep or scoop up and dispose of according to state and local regulations.

Areas of Use:

- *industrial plants
- *steel fabricators
- *plumbing departments
- *custodial services
- *apartment complexes
- *building maintenance
- *manufacturing plants
