

# Concreteman

Concrete repair putty

**CONCRETEMAN** is a handy, ready to use concrete repair putty that is designed for sealing small holes and patching chips in concrete, including floors, stairs, wall tiles, lawn ornaments and statues. It is a very convenient way to fill holes in sidewalks drilled by utility work crews and repair minor damage on any concrete surface. When dry it has the color of concrete for less noticeable repairs. **CONCRETEMAN** hardens like concrete in on hour and can be drilled, tapped, filed, sawed, or painted once cured. This epoxy putty can also be used under water and has a cure time of only 60 minutes for quick fixes. May cause mild skin irritation, use Omega's **SHIELD** skin protector to reduce potential for irritation while maintaining dexterity. For other surfaces that need repaired, try Omega's full line of repair putty products; **STEELMAN, PLASTIKMAN, AND WOODMAN** repair putty.

**Directions:** For best results roughen area to be treated by sanding or filing. Twist off desired amount of **CONCRETEMAN** and knead into a uniform color. Apply at once to the surface as hardening begins immediately. For underwater application, work the mixed epoxy forcefully into the substrate and hold until adhesion begins to take effect. Wash hands and tools to remove residue. If no water source is available, use Omega's **ROUGHMAN** hand towels to clean hands and tools.

**Areas of Use:**

- \*utility companies
- \*apartment complexes
- \*grounds departments
- \*hotels
- \*cities & counties
- \*building maintenance

Health	1
