

# Cool It

Circuit board cleaner

This product is a high purity, moisture free freezing agent for electronic applications. **COOL IT** allows isolation of single components in low temperature electronic testing. Protects delicate and expensive components during soldering or desoldering and non-destructive testing of electronic and electro-mechanical systems. Quickly cools thermostats for activation and testing, and is a highly efficient localized heat sink for assembly of electronic circuits. Instantly chills small pins, shafts, bushings, etc. for precision shrink fitting. With intermittent failures, **COOL IT** can be used to cool suspected components to see if operation returns to normal when the temperature is lowered. **COOL IT** is 100% ozone safe, and contains 0% VOC. To keep contacts and parts clean and contaminant free, use Omega's **ENVIRO-TAC** contact cleaner on all of your electronic equipment.

**Directions:** Insert extension tube into shaft for pinpoint application. Hold can 1-2 inches from area to be chilled and spray until frost appears.

#### Areas of Use:

- \*circuit boards
- \*electronic parts
- \*thermostat testing

Health	1
Flammability	0
Reactivity	1
Protection	B

Appearance and odor.....	Colorless liquid, Ether-like odor
Specific Gravity.....	Concentrate - 1.203
Propellant.....	Unknown
VOC.....	0%
NFPA Fire Rating.....	Non-flammable Spray
