

Foam Bac

Ultra Foaming Liquid Alive
Bacteria/Enzyme
Concentrate

Foam Bac is a specially blended liquid form of living bacteria and pure enzymes in a high-foam suspension. **Foam Bac** is designed to promote decomposition of organic matter and the odors associated with them. It is recommended for use in sewer lines, septic tanks, drain lines, holding tanks and garbage areas to control odors, and prevent buildup. **Foam Bac's** natural plant-based surfactants foam through the line, ensuring the desired results with each application.

Directions: For maximum benefit, use 10 ounces of **Foam Bac** per drain each month to keep lines free flowing and to prevent buildup of waste and resulting odors. When used properly **Foam Bac** will also remove soap scum and hair that may cause drain blockage. Spray into garbage areas, dumpsters, and waste collection areas regularly to control odors.

Drain Lines: Use 4 or more ounces 2 to 3 times per week. For best results use at the end of the day to allow time for the bacteria to work.

Sewer Lines: Add a generous amount directly to the line, or mix a 1% solution of **Foam Bac** (1:99 with water) and use with jetting equipment. Spray solution upstream. Wait 10 minutes, then jet again when line is retrieved. Daily use is recommended.

Septic Tanks: Initial treatment: use 1 pint of **Foam Bac** per 200 gallons capacity poured directly into toilet and flushed. Thereafter, use 8 ounces weekly.

Areas of Use:

- *restrooms
- *public buildings
- *custodial departments
- *apartment complexes
- *sewer departments
- *hospitals
- *plumbing departments
- *cities and counties

Health	1
Flammability	0
Reactivity	0
Protection	N/A

Appearance and odor.....	Slightly viscous, hazy green liquid with mild odor.
Specific Gravity.....	Concentrate - 1.03
NFPA Fire Rating.....	Non-Flammable
