

# INSTRUCTIONS

Cleans & Restores Urinals

## U-POD

### Step 1

Remove fragrance bar from plastic envelope. Place the fragrance bar over the white tabs that extend out from the back of the **U-Pod** unit. Replace the front grill cover with the label facing forward.

### Step 2

Always bend the insertion pin (located on top of **U-Pod** unit) back by 45 degrees. This ensures proper tension on the **U-Pod** unit for insertion into the flush hole where the water for the urinal comes out. (Start from the middle of the urinal and keep moving to the right until the **U-Pod** fits into the flush hole above).

### Step 3

To remove the **U-Pod** use the blue bag that comes with each unit to cover your hand to protect it from the urinal. Then gently pull the **U-Pod** down and discard the unit into the disposable container, (trash can).

### Important note:

If the regular pin on top of the **U-Pod** unit fails to get inserted into the urinal flush hole, then use the suction cup that comes with the **U-Pod** unit. Do this by inserting the stem of the suction cup into the hole located in the back of the **U-Pod**.

Clean the surface of the urinal wall with hand soap and paper towel. Scrub gently in a circular motion where the suction cup gets attached to the urinal. The suction cup works better wet, so flush the urinal before attaching it.

### Interesting facts about U Pod:

1. 7 second installation with no tools, tape or screws required.
2. 7 minutes and the fragrance bar fills the entire restroom with organic green fragrance.
3. 7 days and 90% of the urinal smell is eliminated and 50% - 90% of urine stains are washed away.
4. Using the U-Pod consistently will restore the pipes and sewer lines.
